3:00 – 4:00 PM
Maria Sanford, Room 101

MATHEMATICAL PROBLEM-SOLVING TOOLS THAT EVERYONE SHOULD KNOW

FREDERIC LATOUR

CENTRAL CONNECTICUT STATE UNIVERSITY

Abstract: There are many problems from several branches of mathematics that have elegant solutions requiring knowledge that is not always taught at the high school or undergraduate level, but nevertheless are easily accessible to students. I will present examples of such problems, explain the tools that are needed for their solutions, and solve the problems.

This talk will be accessible to a broad audience of faculty and students.
