THE EFFECT OF GENDER ON MATHEMATICS PERFORMANCE IN A LOW-INCOME HIGH SCHOOL

MARYKATE MCCRACKEN

CENTRAL CONNECTICUT STATE UNIVERSITY

Abstract: Are boys really better at math than girls? This talk will discuss the results of my Master's thesis, which studied mathematics performance on midterm examinations at a low-income school broken down by gender. The talk will cover a review of literature on mathematics performance broken down by gender in the US and internationally, the methods used in my research, the results of my study, and the implications for future research.
