**KEEPING ONLINE/VIRTUAL
STUDENTS ENGAGED**

JACQUELINE JENSEN-VALLIN

LAMAR UNIVERSITY

Abstract: It would be easy to think of online-only courses as ways to merely give information to students, without the amount of interaction you might see in a face-to-face course. But there are many ways to supplement online courses to keep students engaged.

I will share my experience and discuss ways to keep students logging in and interested, including posting frequent announcements, the use of discussion boards, and using homework systems to continuously engage students. Thoughts, suggestions, and conversation will be welcome.
